Hi Harry

Thank you for confirming and for coming into our Showroom yesterday afternoon. It was great to meet you and your daughter again.

I have noted on the order sheet to remove ARGON GAS from the paperwork and to change the Entry Door Panel to have the Dark Cedar Woodgrain finish to the outside of the Panel with Mannex Coal Dust colour to the inside.

We have also changed the Entry Door Handle as we discussed yesterday. Please see Detail attached.

Kind Regards Tom

Kia ora Tim,

It was nice to meet you yesterday. Thank you for your excellent products and services.

Further to our conversation, we have agreed that our double glazed glasses do not have argon gas since we have never

requested it and it does not fit for our purposes. It is because argon gas is easy to leak which creates a gap in the seal due to its physical properties.

Please feel free to let us know if there are any problems.

Nga mihi,

Harry
