Kia ora Fair Way,

Thank you for providing the dispute resolution services.

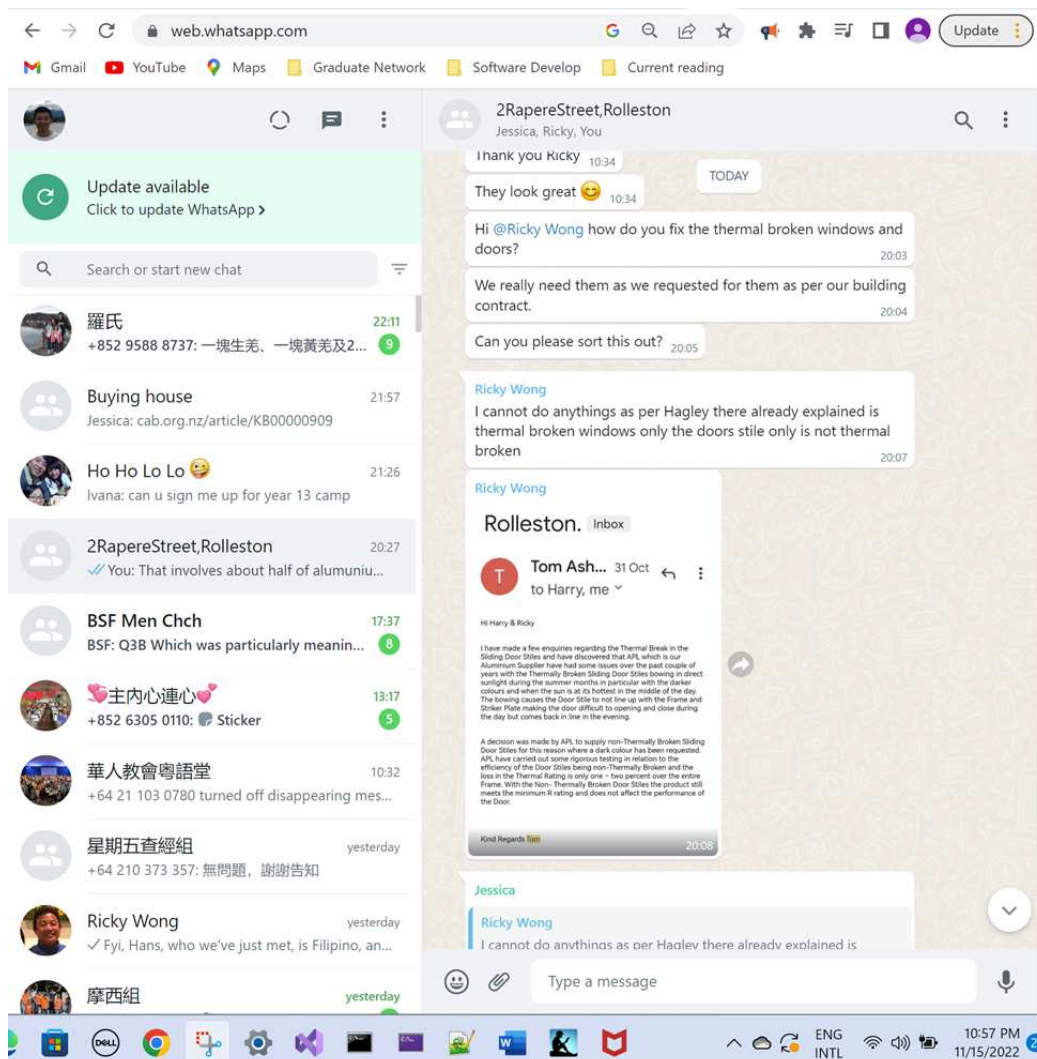

The Registered Master Builders Association introduced Fair Way to us for helping with the building project of our residential house.

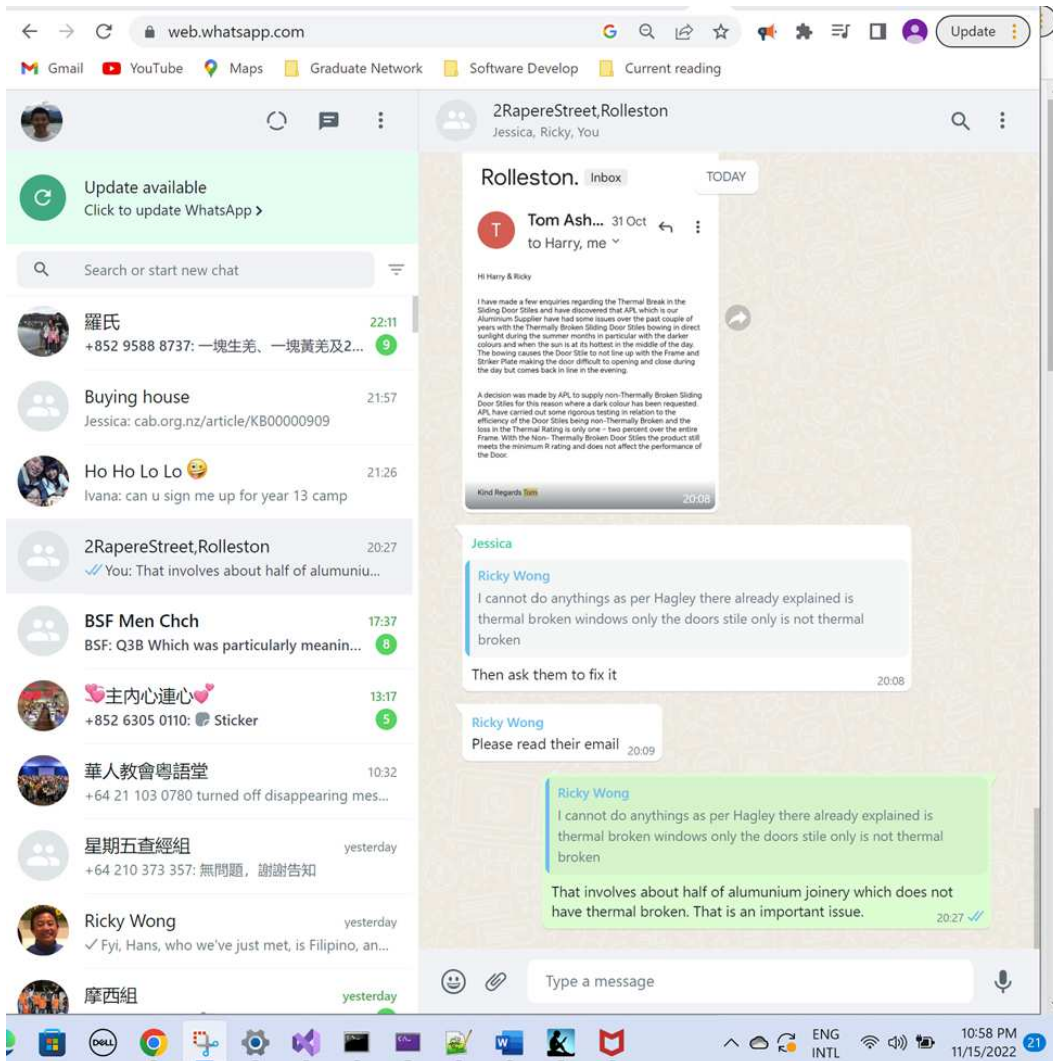

During our site visit on 29 October 2022 after all the aluminum windows and doors have been installed, we found that:

- about half of the aluminum windows and doors are not thermally broken (refer to the emails below on and before 8 November 2022).

According to our contract, the builder (JSR Construction, Ricky is the builder representative) shall provide us with all thermally broken aluminum windows and doors. The supplier admitted in the email below on 31 Oct 2022 at 8:01 am that our ordered aluminum windows and doors are all thermally broken. The supplier also said that they cannot provide those thermally broken aluminum joineries in the email below on 31 Oct 2022 at 2:02 pm. We requested the builder to fix the windows and doors in the email below on 6 November 2022, In the screenshots of the whatsapp conversation below on 15 November 2022 about this thermally broken issue, the builder refused to fix it.

May I have your advice and kind help? Thank you so much.

Thank you so much for your kind help.
Nga mihi,
Kind regards,
Harry Lo

Hi Harry

The issues you have advised appear to more contractual issues than defects under the guarantee.

There is a free dispute resolution service available to customers of Registered Master Builders, called Fair Way which may help in resolving contractual disputes. There details are:

Fair Way

Email: build-disputes@fairwayresolution.com

Subject: Claim remedial work: Master Build Guarantee No 238598 (2 Rapere Street, Rolleston 7615)

Some people who received this message don't often get email from harrykhlo@gmail.com. [Learn why this is important](#)

Dear Registered Master Builders Association,

Thank you for providing us with the Master Build Guarantee No 238598 for our house at 2 Rapere Street, Rolleston 7615.

During our site visit on 29 October 2022, we found the following items are wrong:

1. Parts of aluminum windows and doors are not thermally broken (refer to the emails below). According to our contract, the builder shall provide us with all thermally broken aluminum windows and doors.
2. The mortar of the brick is wrong. Builder does not follow the method of the brick supplier to handle the mortar mix and match the color. The builder has agreed to handle the mortar mix according to the brick supplier's method and to match the color shown in the supplier's showroom at 189 Main South Road, Christchurch. and the builder's showhome at 3 Old Stone Lane, Christchurch. According to our contract, the builder shall match the colour.
3. The power supply cable to the house is not a 3-phase cable. According to our contract, the builder shall provide a 3-phase power supply system in the house.

May I have your advice on how we can make the claim for the remedial work?

Thank you so much for your kind help.

Kind regards,

Harry Lo

Hi Ricky,

Thank you for your effort in building our house.

We found that some of the aluminum windows and doors are not thermally broken during our site visit on 29 October 2022.

Could you please fix the windows and doors.

Thank you so much for your kind help. Please feel free to contact us if there are any concerns or questions.

Kind regards,

Harry

Hi Harry & Ricky

I have made a few enquiries regarding the Thermal Break in the Sliding Door Stiles and have discovered that APL which is our Aluminium Supplier have had some issues over the past couple of years with the Thermally Broken Sliding Door Stiles bowing in direct sunlight during the summer months in particular with the darker colours and when the sun is at its hottest in the middle of the day. The bowing causes the Door Stile to not line up with the Frame and Striker Plate making the door difficult to opening and close during the day but comes back in line in the evening.

A decision was made by APL to supply non-Thermally Broken Sliding Door Stiles for this reason where a dark colour has been requested. APL have carried out some rigorous testing in relation to the efficiency of the Door Stiles being non-Thermally Broken and the loss in the Thermal Rating is only one – two percent over the entire Frame. With the Non-Thermally Broken Door Stiles the product still meets the minimum R rating and does not affect the performance of the Door.

Kind Regards Tom

Hi Ricky,

The photos of white aluminium frames you sent Tom were not for our house.

On the photos of the black aluminium frames, the layer marked thermal broken is a strip of aluminium but not the thermal broken layer.

Please have a further investigation.

Thanks.

Harry

Hi Ricky

I can see the thermal break in both those photos so no need to go to site.

Cheers Tom

Hi Ricky

I have just checked our paperwork here and all items are thermally broken as requested.

The client didn't want Argon Gas to the Double Glazed Units so this was not provided.
